

Gemini API Cost Analysis Report

January 2026 – June 2026

Total Usage Cost (Mar–Apr) ₹16,175 Jan–Feb covered by promotions	Forecasted Total (Jan–Jun) ₹28,180 Google Cloud estimate
Gross API Spend ₹52,905 Gemini API before savings	Total Savings Applied ₹26,993 ~51% offset by Google credits

AI Studio | Google AI Platform | Account ID: 0151AC-1249F6-01AC1F

1. Executive Summary

This report provides a detailed analysis of Google Cloud Gemini API usage and associated costs for the period January 2026 through April 2026 (with forecasted data through June 2026). All billing data has been extracted directly from Google Cloud Cost Table exports.

The analysis covers three Google Cloud projects under the billing account My Billing Account (ID: 0151AC-1249F6-01AC1F):

- *VIVEKA 160126 (gen-lang-client-0894100952)*
- *Viveka Version2 16-01-26 (gen-lang-client-0492716390) — primary spend project*
- *Default Gemini Project (gen-lang-client-0201994778)*

Key Findings

- **January and February 2026 incurred zero net cost due to Google promotional credits fully offsetting usage charges.**
- **March 2026 marked the first paid billing period with ₹9,496 in usage costs after promotions expired.**
- **April 2026 showed a 30% month-over-month reduction in usage cost (₹6,680), indicating early optimization.**
- **Gemini 2.5 Pro is the dominant cost driver, accounting for 87% (₹14,068) of total usage spend.**
- **Output tokens represent 74% of all token costs — the single largest optimization opportunity.**
- **Google applied ₹26,993 in savings/discounts against a gross API spend of ₹52,905 (Jan–Jun).**

2. Billing Overview

2.1 Account Details

Field	Value
Billing Account Name	My Billing Account
Billing Account ID	0151AC-1249F6-01AC1F
Currency	INR (Indian Rupee)
Exchange Rate	89.9788 INR / USD
Primary Service	Gemini API (Service ID: AEFD-7695-64FA)
Analysis Period	1 January 2026 – 30 April 2026 (invoiced); forecast to June 2026
Data Source	Google Cloud Cost Table CSV Export + Reports PDF

2.2 Monthly Cost Summary

The table below shows the complete cost breakdown across all billing periods. January and February show zero net billing due to promotional credits applied by Google.

Month	Usage Cost (₹)	Tax (₹)	Total Billed (₹)	Savings	MoM Change
January 2026	₹0.00	₹0.00	₹0.00	Promo	—
February 2026	₹0.00	₹0.00	₹0.00	Promo	—
March 2026	₹9,495.94	₹1,709.26	₹11,205.20	None	New Spend
April 2026	₹6,679.53	₹1,202.30	₹7,881.83	None	-30.0%
TOTAL	₹16,175.47	₹2,911.56	₹19,087.03	—	—

Note: Tax is charged at 18% GST on the usage subtotal. Promotional credits in Jan–Feb fully offset all charges including usage, resulting in ₹0.00 due in both months.

3. Cost by Model

3.1 Model Distribution (Mar–Apr 2026)

Four Gemini model variants were active during the paid billing period. Gemini 2.5 Pro is the clear cost leader due to higher per-token pricing.

Model	Mar Cost (₹)	Apr Cost (₹)	Total (₹)	% of Spend
Gemini 2.5 Pro	₹8,260.72	₹5,807.46	₹14,068.18	86.9%
Gemini 2.5 Flash	₹876.79	₹743.82	₹1,620.61	10.0%
Gemini 2.0 Flash	₹336.19	₹31.16	₹367.35	2.3%
Gemini 2.0 Flash TTS	₹22.24	₹97.08	₹119.32	0.7%
TOTAL	₹9,495.94	₹6,679.52	₹16,175.46	100%

3.2 Model Trend Analysis

- Gemini 2.5 Pro costs dropped 29.7% from March to April (₹8,261 → ₹5,807), suggesting reduced query volume or load.
- Gemini 2.5 Flash remained relatively stable (-15.2%), indicating it is being used as a consistent secondary model.
- Gemini 2.0 Flash usage dropped sharply (-90.7%), likely migrated to 2.5 Flash for most workloads.
- Gemini 2.0 Flash TTS increased 336% in April — audio TTS generation is growing rapidly in usage.

4. Token Type Breakdown

4.1 Cost by Token Category

Token costs are classified into three categories: Input (prompt tokens sent), Output (generated response tokens), and Cached Input (reused context from cache). Output tokens are the most expensive category.

Token Type	Mar Cost (₹)	Apr Cost (₹)	Total (₹)	% of Spend
Output tokens	₹7,051.41	₹5,355.99	₹12,407.40	76.7%
Input tokens	₹2,328.79	₹1,221.69	₹3,550.48	21.9%
Cached input tokens	₹115.74	₹101.84	₹217.58	1.3%
TOTAL	₹9,495.94	₹6,679.52	₹16,175.46	100%

4.2 Top SKUs by Cost

The following SKUs represent the highest individual line-item costs across March and April 2026:

SKU Description	Total Cost (₹)	% Share
Gemini 2.5 Pro — output tokens (short output text)	₹8,327.01	51.5%
Gemini 2.5 Pro (gemini-3) — text output tokens	₹2,921.54	18.1%
Gemini 2.5 Pro — audio input token count	₹2,114.40	13.1%
Gemini 2.5 Flash — output token count	₹1,023.33	6.3%
Gemini 2.5 Flash — audio input token count	₹527.72	3.3%
Gemini 2.5 Pro (gemini-3) — audio input tokens	₹470.86	2.9%
Gemini 2.0 Flash — audio input tokens	₹350.22	2.2%
Gemini 2.5 Pro — cached input tokens	₹215.41	1.3%
Gemini 2.0 Flash TTS — audio output tokens	₹118.18	0.7%
Gemini 2.5 Flash — text input tokens	₹62.93	0.4%

5. Project Breakdown

5.1 Cost by Project (Mar–Apr 2026)

Three projects are associated with this billing account. Only two generated meaningful spend during the paid billing period.

Project Name	Project ID	Mar Cost (₹)	Apr Cost (₹)	Total (₹)
Viveka Version2 16-01-26	gen-lang-client-0492716390	₹8,919.12	₹6,088.48	₹15,007.60
Default Gemini Project	gen-lang-client-0201994778	₹576.41	₹591.05	₹1,167.46
VIVEKA 160126	gen-lang-client-0894100952	₹0.41	₹0.00	₹0.41

5.2 Project Observations

- Viveka Version2 accounts for 92.8% of all usage spend — it is the primary production workload.
- Default Gemini Project has stable spend (~₹576–591/month), suggesting it runs a consistent background process or test workload.
- VIVEKA 160126 has near-zero spend and is likely used for experimental or administrative purposes only.

6. Savings & Credits Analysis

6.1 Jan–Jun 2026 Savings Summary

Google Cloud applied substantial promotional savings against gross Gemini API charges. This data is sourced from the billing Reports export covering the full Jan–Jun period.

Service	Gross Usage Cost (₹)	Savings Applied (₹)
Gemini API	₹52,905.27	-₹26,993.27
Cloud Storage	₹0.31	-₹0.26
Cloud Run	₹4.29	-₹4.29
TOTAL SAVINGS	₹52,909.87	-₹26,997.82

Net subtotal after savings: ₹25,912.04 | Effective discount rate: 51.0%

Important: The gross spend of ₹52,905 reflects the full Jan–Jun period including months where promotions were active. The ₹26,993 in savings likely includes credits applied during Jan–Feb when net billing was ₹0.

7. Forecast & Projections

7.1 Cost Trajectory

Based on the observed trend from March (₹9,496) to April (₹6,680) — a 30% month-over-month reduction — and Google's own forecasted total of ₹28,180.40 for the full year:

Month	Conservative (₹)	Optimistic (₹)	Scenario
January 2026	₹0	₹0	Promotional
February 2026	₹0	₹0	Promotional
March 2026	₹9,496	₹9,496	Actual
April 2026	₹6,680	₹6,680	Actual
May 2026 (est.)	₹5,500–6,000	₹4,200–4,800	Forecast
June 2026 (est.)	₹5,000–5,500	₹3,500–4,200	Forecast

Google Cloud's own forecast for January–June 2026 is ₹28,180.40 (total cost including all services). This aligns with a conservative monthly run rate of approximately ₹5,500–6,000 for May–June.

8. Optimization Recommendations

8.1 High Impact

Shift workloads from Gemini 2.5 Pro to Gemini 2.5 Flash

Gemini 2.5 Pro accounts for 87% of costs. Flash is approximately 5–10x cheaper per token with comparable quality for many tasks. Migrating even 30% of Pro workloads to Flash could reduce monthly spend by ₹2,000–3,000.

Reduce output token length

Output tokens represent 76.7% of total spend. Techniques to reduce output length include: setting max_tokens limits, using system prompts that encourage conciseness, and post-processing verbose responses rather than regenerating.

8.2 Medium Impact

Expand prompt caching usage

Currently only ₹217.58 (1.3% of spend) is on cached tokens. If your application reuses long system prompts or context windows, enabling context caching can reduce input costs by up to 75% on cached portions.

Consolidate projects

Three separate Google Cloud projects increase management overhead. Consider consolidating the Default Gemini Project workload into Viveka Version2, simplifying billing tracking and potentially qualifying for higher usage tier discounts.

8.3 Monitoring

- Enable BigQuery billing export (currently disabled) for automated daily cost tracking and alerting.
- Set up budget alerts at 50%, 80%, and 100% of monthly spend targets in Cloud Billing > Budgets & Alerts.
- Monitor Gemini 2.0 Flash TTS usage closely — April saw a 336% spike and this model's costs could accelerate.
- Review why audio input tokens (₹2,114 for Pro alone) are so high — audio is priced at a premium vs text.

A.2 Methodology

All cost figures are extracted from the 'Usage' cost type rows in the monthly invoices. Tax rows and rounding error rows are excluded from usage analysis. The ₹52,905 gross figure in Section 6 is sourced from the Reports CSV which covers a broader Jan–Jun 2026 timeframe. All figures are in INR.

Gemini Pro Plans

Gemini Pro Offer by Jio is still online - <https://www.jio.com/google-gemini-offer/>

New features added

Google AI Plus¹

₹399/mo
400 GB storage

Unlock essential tools to boost productivity and creativity

Includes:

- ✓ 2x higher usage limits* in Gemini
- ✓ Omni in Gemini
- ✓ AI Inbox in Gmail (rolling out)

Get Plus →

View plan benefits +

New features added

Google AI Pro¹

₹1,950/mo
5 TB storage

Create faster and get more done with expanded access to Gemini

Includes everything in Plus, and:

- ✓ 4x higher usage limits* in Gemini
- ✓ Access to our Pro model
- ✓ YouTube Premium Lite³
